Working towards a B.S. of Computer Science with completed coursework in Calculus II, Data Structures, User Interface and Design, Discrete Structures, Java, C++, Bash PowerShell

–Cal Poly Computer Science Society

PROJECTS

Student Management System — *Student-Manager(Java)*

A GUI based program that stores, views, and edits a local SQL database in order to keep track of student information. A work in progress, code can be found on GitHub as StudentManagement.

Book Warehouse— *Database-like program(C++)*

A c++ executable that reads textbook information from a .dat file and creates objects for each entry which is then stored in a linked list which can be searched by isbn.

Gift-Exchange Randomizer — *personal (Java)*

A java client that takes user input to randomize a gift exchange and automatically emails participants to preserve anonymity.

Ecommerce Site — *Extracurricular Group Project (full stack)*

A work in progress ecommerce site that a group of peers and I have begun building using react, express, and mysql.

SKILLS

Proficient: Java, C++, SQL
Exposure: Python, HTML, CSS, Javascript, express, node.js, react.js
